Art Unit: 2655

In response to applicant's pre-amendment dated August 27, 2003. the following action is taken:

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 29-33 are rejected under 35 U.S.C. 102(e) as being anticipated by Heo (6449227).

The claimed invention is drawn to the limitation "at least one item selected from". Thus only one of the limitations is needed to be shown in order to meet the claimed invention. Claim 29 is drawn to an audio ATS having audio channel data. The channel data having rear and front channel data (Dolby AC-3, Stereo...etc). The ATS having a first parameter such as one of Q1, Q2, sampling frequencies. The second parameter having assignments (management data). The data further having video title set (VTS) having Q1, Q2, sampling frequencies and assignment (management data). Basically the claim read on a standard DVD format having ATS and VTS data thereon. The reference shows the use of a DVD format having an ATS and VTS each of the titles having at least one of the quantization bits and sampling frequencies as shown in fig 1. the

reference in figs 8B-9C shows the elements within the VTS and figs 15-18C shows the elements within the ATS.

With respect to the limitations of claims 30-32. see column 19 line 34 through the description of Table 9 in a DVD recording and reading apparatus.

With respect to the limitation of claim 33 see figs 17A—18C showing the attribute and fig 1 showing the use of AOB.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. 6208802.
